practice 1

practice 2

Practice 2 Install a deb file via CLI
Go to https://code.visualstudio.com/#alt-downloads and download the deb package.
a. Note: for M1/M2 users you need to download the arm64 deb package.
1. It is possible that you still have the code*.deb package in your downloads folder. If so, please delete the file that has the (1) in the file name as it is the same that you downloaded during lab 2
2. Open a terminal and use apt to i
a. Type: sudo apt install ./Downloads/
b. Then use the tab key to autocompl not happen, check step 1 again.
c. When you are asked to continue th setup.
