Practice 2 | Creating files and Directories
1. Change your present working directory to /usr/share
2. Create a directory in your home directory called website without using the cd command.
3. Create a the directories: assets/images/small inside the website directory.
4. Create a file inside website/assets/images/small called logo.png
5. Remove the logo.png file
6. Remove the website directory

Managing Files and Direct
docs.google.com/presentation/d/e/2P
Practice 3 | Moving and Renaming Files
1. Create a directory called website in your home directory. Inside the website directory, create a directory called assets.
2. Run this command:
curl https://cis106.com/assets/samplesite.txt -o ~/website/index.html
3. Download two images from the site: pexels.com
4. Move the images from the Download directory to the website/assets directory
5. Rename the images using the name convention: image.png and image2.png
6. Open the file index.html located inside the website directory. Do you see the images in the page?
